Agricultural and Forest Meteorology 95 (1999) 267–268

AGRICULTURAL AND FOREST METEOROLOGY

Contents of Volume 95, 1999

VOL. 95, NO. 1 — 31 MAY 1999

Measuring sensible heat flux in plastic mulch culture with aerodynamic conductance sensors
J.M. Tarara (Prosser, WA, USA) and J.M. Ham (Manhattan, KS, USA) 1
Fine scale measurement and simulation of penumbral radiation formed by a pine shoot
S. Palmroth, L. Palva, P. Stenberg and A. Kotisaari (Helsinki, Finland) 15
Crop water relations under different CO_2 and irrigation: testing of *ecosys* with the free air CO_2 enrichment (FACE) experiment
R.F. Grant (Edmonton, Canada), G.W. Wall, B.A. Kimball (Phoenix, AZ, USA), K.F.A. Frumau (Amsterdam, The Netherlands), P.J. Pinter Jr, D.J. Hunsaker and R.L. Lamorte (Phoenix, AZ, USA) 27
Dry-season radiation balance of land covers replacing forest in northern Thailand
T.W. Giambelluca, J. Fox (Honolulu, Hawaii, USA), S. Yarnasarn, P. Onibutr (Chiang Mai, Thailand) and M.A. Nullet (Honolulu, Hawaii, USA) 53

VOL. 95, NO. 2 — 2 JUNE 1999

Evapotranspiration model for semi-arid shrub-lands tested against data from SE Spain
F. Domingo, L. Villagarcía (Almería, Spain), A.J. Brenner (Ann Arbor, MI, USA) and J. Puigdefábregas (Almería, Spain) 67
Evaporation from natural and modified raised peat bogs in New Zealand
M.A. Thompson, D.I. Campbell (Hamilton, New Zealand) and R.A. Spronken-Smith (Christchurch, New Zealand) .. 85
The value of precipitation forecast information in winter wheat production
G. Fox, J. Turner and T. Gillespie (Guelph, Canada) 99
Frost risk mapping derived from satellite and surface data over the Bolivian Altiplano
C. François, R. Bosseno, J.J. Vacher (La Paz, Bolivia) and B. Seguin (Avignon Cedex, France) 113

VOL. 95, NO. 3 — 23 JUNE 1999

Use of infrared thermometry for estimation of stomatal conductance as a possible aid to irrigation scheduling
H.G. Jones (Dundee, UK) 139
Carbon and water vapor exchange of an open-canopied ponderosa pine ecosystem
P.M. Anthoni, B.E. Law and M.H. Unsworth (Corvallis, OR, USA) 151
Estimating the diffuse component from daily and monthly measurements of global radiation
M.L. Roderick (Canberra, Australia) 169
Ultraviolet-B and photosynthetically active radiation environment of inclined leaf surfaces in a maize canopy and implications for modeling
R.H. Grant (West Lafayette, IN, USA) 187

VOL. 95, NO. 4 — 5 JULY 1999

Modelling leaf gas exchange in holm-oak trees in southern Spain
J.M. Infante (Sevilla, Spain), C. Damesin (Orsay, France), S. Rambal (Montpellier, France) and R. Fernández-Alés (Sevilla, Spain) 203

A model for soil CO_2 production and transport. 1: Model development
C. Fang and J. . Moncrieff (Edinburgh, UK) 225
A model for soil CO_2 production and transport 2: Application to a florida *Pinus elliotte* plantation
J.B. Moncrieff and C. Fang (Edinburgh, UK) 237
A commentary on the use of a sun/shade model to scale from the leaf to a canopy
D.G.G. de Pury and G.D. Farquhar (Canberra, Australia) 257
Reply to a commentary on the use of a sun/shade model to scale from the leaf to canopy by D.G.G. de Pury and G.D. Farquhar
Y. Ping Wang (Aspendale, Australia) and R. Leuning (Canberra, Australia) 261

Contents of Volume 95, 1999 267
